DeAndre, Matt, we need to get together to talk ASAP about nailing down these flight lines. I spoke with Tim today and he says the mission could be flown the week after next, if we get back to him with final flight lines ASAP. After that the mission could slip to mid-March.

Principles and integrity are expensive, but they are among the very few things worth having.

Dan, I am attaching a .kml for the proposed flight lines for the landfill. Let me know if you could open it and what you think. These will be flown at about 300ft with a spacing of 400ft.
